Professional Summary

Full Stack Developer with expertise in MERN Stack and TypeScript, with a proven track record of building scalable, secure, and responsive web applications. Skilled in RESTful API development, database optimization (MySQL, PostgreSQL, MongoDB), and modern UI frameworks like React and Tailwind. Experienced in Agile methodologies, Git, GitHub, and collaboration tools such as Jira. Skilled in applying best practices to deliver efficient, maintainable, and high-performance code in team-oriented environments.

Technical Skills

Programming Languages: TypeScript, JavaScript, SQL, Java

Frontend Technologies: HTML, CSS, JavaScript (ES6+), React, Tailwind CSS, Redux

Backend Technologies: Node.js, Express.js, Spring Boot, Microservices, WebSockets, RESTful APIs, GraphQL

Cloud & DevOps Tools: GCP (Google Cloud Platform), AWS, Jenkins, Git, GitHub, GitLab CI/CD, Maven, Docker

Databases: MySQL, PostgreSQL, MongoDB

Other Tools: VS Code, IntelliJ IDEA, Postman, Figma, Jira, Jest, Unit Testing, Integration Testing

Work Experience

Associate Software Engineer

smartData Enterprises Inc.

Sep 2024 - Dec 2025

- Designed and implemented secure, scalable, and maintainable Full Stack MERN applications using TypeScript, adhering to engineering Clean Architecture and coding standards.
- Optimized RESTful APIs with Node.js and Express, ensuring secure and optimized data handling.
- Delivered seamless integration of React front-end with backend systems, resulting in a 25% increase in user sessions
- Retention and a smoother UI experience.

Projects

Padel Sports – Court Booking Application

2025

- Built a full-stack padel court booking system using **Next.js** and **Node.js**.
- Designed UI with **shadcn/ui** and implemented secure APIs with **JWT authentication**.
- Managed booking data and availability using **MySQL**.

Tech Stack: Next.js, shadcn/ui, Node.js, Express.js, MySQL, JWT, Jira, GitHub, Jest, WebSockets, AWS

AI Advisor – Automotive Service Assistant

2025

- Built an AI-based chat and voice assistant for car service scheduling using **Vapi AI** and **Node.js**.
- Developed backend APIs to fetch customer data from incoming calls and automate appointment booking.
- Integrated AI workflows with backend systems for real-time customer assistance. Reduced manual call handling by 60% through AI automation.

Tech Stack: Node.js, Express.js, Vapi AI, GitHub, Unit Testing

Education

Maharishi Markandeshwar University, Ambala, Haryana

2021 - 2024

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.12

Achievements

- Contributed to Hacktoberfest (2022–2025) through continuous open-source contributions.
- Completed the Google Cloud Career Practitioner Program (GCCP).
- Earned LinkedIn Badges in Java, Agile Methodologies, Spring Framework, MySQL, Python, Linux, and HTML.

Certificates

- Java - Great Learning
- JavaScript - freeCodeCamp
- Cloud - Google Cloud
- Python - freeCodeCamp
